

BIZTALK:
LEVERAGING
CURRENT
ADVANCEMENTS

NAVIGATE YOUR BIZTALK JOURNEY AND CHOOSE AN APPROACH THAT'S RIGHT FOR YOUR BUSINESS.

BizTalk has come a long way since it first launched in 2000. 11 versions later, Microsoft released BizTalk 2020 in February 2020.

The latest version is packed with new features including support for newer platforms, operational data monitoring and analytics, application life-cycle management and much more.

While an upgrade may sound like the best direction for some, we understand that every business has different needs.

A laptop computer is shown from a front-facing perspective. The screen is the central focus, displaying a white background with a blue border. The text on the screen is centered and reads: "TO HELP YOU DECIDE WHICH PATH IS BEST FOR YOU, START BY CHOOSING A SCENARIO THAT BEST SUITS YOUR SITUATION." The laptop's keyboard and trackpad are visible at the bottom of the frame.

YOU HAVE CURRENT INVESTMENT IN A BIZTALK SOLUTION

In addition to the plethora of new features, upgrading to BizTalk 2020 provides a stepping stone to cloud-first strategy when you're ready.
